

SÉURA LIGHTED MIRRORS

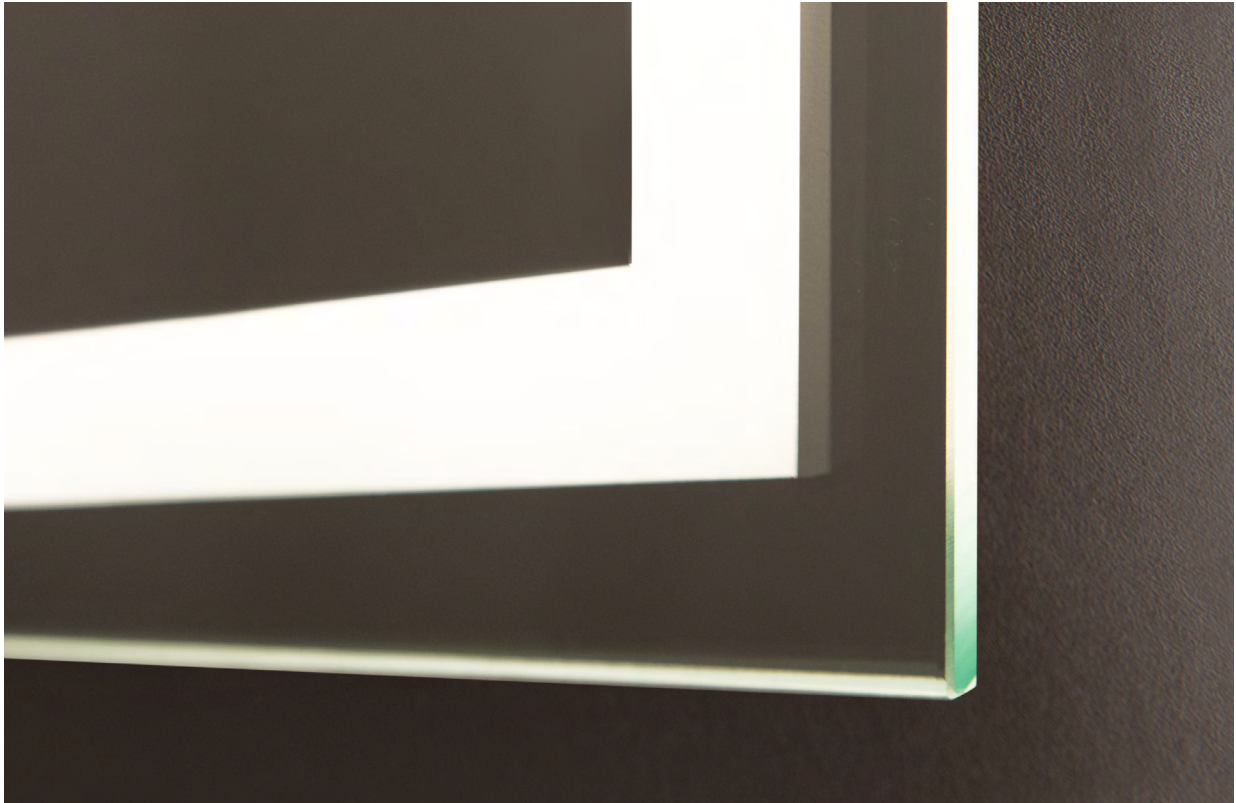

Lifetime Silver Mirrors

Every Séura mirror, including value and Séura Select, utilizes patented copper-free mirror coatings to prevent black edge and de-silvering commonly seen on typical mirrors. Corrosion may occur quickly, often within six months, as a result of moisture, acidic, alkali or ammonia cleaners. Séura mirrors are not susceptible to unsightly black edge or de-silvering.

AFTER 6 MONTHS OF FREQUENT COMMERCIAL CLEANING
