

MIRROR CARE

Séura mirror technology has been developed to completely protect the mirror surface and allow ease of maintenance for the consumer. Please follow the guidelines listed for proper mirror care and cleaning:

The glass surface can be cleaned with any conventional ammonia-free glass cleaner. Care should be taken to use only a soft lint-free cloth or microfiber towel. Apply all cleaners directly to the cloth and not the mirror surface.

Stubborn spots can be removed with solvents such as mineral spirits, de-natured alcohol, and acetone. Immediately remove solvent and dirt residues per the prescribed methods above with a compatible glass cleaner or water.

Take care when moving the mirror or accessories near the edges of the mirror. Exposed polished edges of glass are susceptible to chipping when in contact with other hard surfaces such as a faucet or metal soap dispenser.
